NEW EDUCATORS NETWORK

This project offers anyone new to teaching in the Sydney Region (from student teachers to early career teachers in their first 5 years of teaching) :

- a place to network with other new educators
- an opportunity to receive support and advice from other new educators and experienced educators
- professional development in their new career or studies
- a chance to share experiences and ideas
- the opportunity to gain from the advantages of membership with the only professional association for all educators, across all sectors and all levels (you must be an ACE member to participate in this program)

Mentoring Project

Our region is one of the first regions in ACE to establish a network for new educators. We invite experienced educators who would be interested in developing the mentoring component of this project to contact us by email or phone by 1st February.
